Use the puzzle on the back to highlight the following excerpts from speeches given by Martin Luther King and John Kennedy. Each speech will start in the upper left corner and continue making only 90-degree turns.

Highlight each speech in a different color.

John F. Kennedy

In the long history of the world, only a few generations have been granted the role of defending freedom in its hour of maximum danger. I do not shrink from this responsibility—I welcome it.

I do not believe that any of us would exchange places with any other people or any other generation. The energy, the faith, the devotion which we bring to this endeavor will light our country and all who serve it—and the glow from that fire can truly light the world.

And so, my fellow Americans: ask not what your country can do for you—ask what you can do for your country.

Dr. Martin Luther King Jr.

I have a dream that one day this nation will rise up and live out the true meaning of its creed: "We hold these truths to be self-evident, that all men are created equal."

I have a dream that my four children will one day live in nation where they will not be judged by the color of their skin but by the content of their character.
