

Name#: _____

Block: _____

VISUALIZE WORDLY WISE

Your challenge: To see letters beyond their dull, practical functionality and visualize the meaning of a word, using only graphic elements of the letters forming the word, without adding any outside parts.

Examples:

Directions: You are to choose 4 words (any form) from your lesson _____ wordlist and show the meaning of the words by rewriting the words, but using only the letters to reform/reshape the words to show the meanings. If a word has more than one meaning, choose only one to use. However you can reuse any form of a word if that word has multiple definitions that are completely different. If you're not sure if they're different, you can check with Mr. Hence.

In addition, on your final copy you must provide the necessary information relating to the vocabulary word. Use the space below to rough draft your artwork and then on the attached piece of paper you are to provide a neat and clean final copy that is also colored.
