

Solar system	The Sun and all the bodies that orbit it
Revolution	One full orbit of an object around another object
Axis	An imaginary center line around which the Earth rotates
Rotation	One whole spin of an object on its axis
Space probe	A spacecraft that gathers data without a crew
Comet	A frozen mass of ice and dust orbiting the sun
Asteroid	A rocky mass up to several hundred kilometers wide that revolves around the sun

Satellite	An object in orbit around another object
Moon phase	An indication of the fraction of the Moon that is illuminated as seen from Earth
