Bullying is defined as intentionally aggressive behavior that can take many forms (verbal, physical, social/relational/emotional, or cyber bullying— or any combination of these); it involves an imbalance of power, and is often repeated over a period of time. The bullying can consist of one child bullying another, a group of children ganging up against one lone child, or one group of kids targeting another group.

“Cyber Bullying” includes, but is not limited to, the following misuses of technology: harassing, teasing, intimidating, threatening another person, sending or posting inappropriate and hurtful digital messages, digital pictures, or web postings.

Individuals who believe they have been the victims of such misuses of technology should not erase the offending material, but should print a copy of the material and report the incident to the school principal. Students of New Lenox School District 122 are strongly discouraged from using social networking websites such as, but not limited to, Facebook, Twitter, Snapchat or Instagram.

School officials may conduct an investigation or require a student to cooperate in an investigation if there is specific information about activity on the student’s account on a social networking website that violates a school disciplinary rule or policy. In the course of an investigation, the student may be required to share the content that is reported in order to allow school officials to make a factual determination.

NOTICE: The District uses a wide variety of digital learning tools and applications to promote student learning. In order for students to use some of these programs and services, certain personally identifying information such as the student's name and grade must be provided to the website operator. Under federal law, the website operator must provide certain notifications to and collect parental consents from parents before collecting certain personal information from children under the age of thirteen. The law permits schools to consent on behalf of all of its students, however, where the website operator agrees to only use personal information provided for the school's benefit, and not for any commercial purpose, including marketing or advertising. This eliminates the need for the website operator to obtain consent from parents directly. By signing the Handbook Agreement, you agree that you have received notice that the District consents on behalf of parents as allowed by law to share personal information about your student such as first name, last name, and grade to such website operators.
