Rigoberta Menchu

The four-hundredth anniversary of Columbus’s famous voyage was commemorated in 1892 with much fanfare throughout North and South America. The five-hundredth-anniversary celebrations, in 1992, were muted by comparison. Instead of celebrating, many people drew attention to how thoroughly the European settlers had wreaked devastation upon the original inhabitants of the Americas. In that year, too, the Nobel Committee awarded its Peace Prize to Rigoberta Menchu, a thirty-three-year-old native woman from Guatemala. She was honored for her “increasingly prominent part as an advocate of native rights.”

Until Menchu was sixteen, she spoke only Quiche, one of some twenty dialects of the Guatemalan native peoples. The Quiche are the descendants of the once-proud Mayas. Mayan civilization flourished in Central America until about 900. Menchu came to prominence in 1983 with the publication in Spanish of her autobiography I, Rigoberta Menchu. The book gives an account of the atrocities committed by government forces from the 1960s up to the 1980s against the peasant population of Guatemala.

While the country’s elite lived in heavily guarded, luxurious homes in Guatemala City, the native peoples lived in abject poverty. Natives made up more than half of the population. Their little plots of land, which provided only a meager living, could be seized without warning by wealthy landowners. To protest was to risk severe punishment by the army. An entire village could be razed and its inhabitants slaughtered. During the thirty-year conflict, an estimated one hundred thousand unarmed native peasants were killed; tens of thousands fled the turmoil in the countryside for the safety of neighboring Mexico. There they languished for many years in refugee camps. Others escaped to the mountains to wage a decades-long civil war against the army.

Menchu’s own family experienced terrible losses for resisting the army’s rigid control of the country. Her father was repeatedly beaten and jailed for organizing nonviolent protests. In 1980, he was part of a group that occupied the Spanish embassy in Guatemala City. The goal was to draw attention to the government’s flagrant abuses of human rights. During this occupation, the building was set on fire, killing those trapped inside. Later, Menchu’s sixteen-year-old brother, along with twenty others, were abducted and killed by the
military. A year later her mother was abducted by army officers and killed. Her body was left unburied as a dire warning to other “troublemakers.”

Two of Menchu’s sisters joined the armed resistance groups fighting within the country. She herself escaped to Mexico in 1981. From there she worked to draw the world’s attention to the plight of her people. The awarding of the Nobel Peace Prize enhanced enormously her ability to tell her story, both within Guatemala and in the world at large. She used the $1.2 million prize money to further her campaign for peace in Guatemala and the rights of native peoples throughout the hemisphere. There was one further benefit of winning the prize: As a world-famous figure, she was free to visit her native land without fear of reprisal by government forces.

The thirty years of civil war ended in 1996 with the signing of peace accords between the rebels and the government. However, progress toward the goals outlined in the accords was painfully slow; a great deal of mistrust still existed between the two sides. In February 2004, President Oscar Berger appointed what he called “a goodwill ambassador” to speed up the process. The person he named to the post was Rigoberta Menchu.

She has tried to further her aims by being politically active. In 2011 she ran in the Guatemalan presidential election and won over 150,000 votes, finishing sixth out of ten candidates. Her work continues through the Rigoberta Menchu Foundation. The mission of the foundation is to seek world peace by pursuing justice and equality, especially for native peoples. Among its many specific goals are the improvement of education and access to information technology within native communities.

**Fun & Fascinating FACTS**

- The Latin prefix *ab-*, “from” or “away,” combines with the root from the Latin verb *jacere*, “to throw,” to form the adjective *abject*. Its original meaning is “cast out” or “rejected.” It now means “wretched” or “in a low state.”

- The Latin *flagrare* means “to burn” and forms the root of the adjective *flagrant*. The original meaning of this word was “flaming” or “blazing,” which changed over time to “outrageous” or “conspicuously bad.” A blazing fire is certainly conspicuous, and perhaps it is this connection that led to the change in meaning.

- One of the meanings of *raise* is “to build.” It is curious then that *raze*, a word with the same pronunciation, has just the opposite meaning, “to destroy completely.” (While it can take a team of workers several days to *raise* a barn, a tornado can *raze* it in a matter of minutes.)
